CAREER OBJECTIVE

Python Django Developer (MCA Graduate) with hands-on experience building full stack applications using Django REST Framework, and MySQL. Developed real-world projects with JWT authentication and cloud deployment. Actively seeking a fresher/junior backend or full stack role to contribute and grow in a professional team.

EDUCATION

Masters of Computer Applications (MCA)
University Arts and Science College, Warangal

2023 - 2025
CGPA: 7.6/10

TECHNICAL SKILLS

- **Programming Languages:** Python
- **Frontend:** HTML5, CSS3, Bootstrap, JavaScript
- **Backend:** Django, Django REST Framework (DRF), REST APIs
- **Database:** MySQL
- **Authentication:** JWT, Role-Based Access Control
- **Tools:** Git, GitHub, VS Code, Postman
- **Deployment:** Render, Vercel

PROJECTS

1. MCA Study Hub – Academic Notes & Resource Platform (Python Full Stack)

[MCA STUDY HUB](#)

- Developed MCA Study Hub, a full-stack academic resource platform using Python Full Stack, enabling MCA students to securely access notes and previous-year question papers, with a clean responsive UI to view, download, and bookmark subject-wise PDFs organized by Year, Semester, and Subject.
- Implemented an admin dashboard to upload, edit, delete PDFs and manage academic structure, reducing manual content management by ~40%.
- Integrated JWT authentication, role-based access control, cloud PDF storage, and dark/light mode, ensuring secure access and improved user experience.

Technologies Used: Python, Django, Django REST Framework (DRF), MySQL, HTML5, CSS3, JavaScript, JWT Authentication, REST APIs, Git, GitHub

2. Smart EV Station Locator – Python Full Stack Application

[SMART EV STATION](#)

- Developed a Smart EV Station Locator using Python Full Stack (Django + Frontend) to help users easily find nearby EV charging stations through a responsive UI.
- Implemented search, real-time station availability, and location details, improving user accessibility and navigation efficiency by ~30%.
- Built secure admin workflows using Django Admin Panel to manage stations, availability, and user data, reducing manual updates by ~40%, while optimizing backend performance and frontend responsiveness for a smooth user experience and scalable system architecture.

Technologies Used: Python, Django, Django ORM, MySQL, HTML5, CSS3, JavaScript, Bootstrap, REST APIs, Git, GitHub

3. Smart Canteen Menu System – Django Full Stack Application

[SMARTCANTEEN](#)

- Developed a production-ready Smart Canteen Menu System using Django Full Stack, enabling users to browse menus, manage carts, and place orders through a responsive UI.
- Implemented secure authentication, search/filter, dark–light mode, and PWA-ready features, improving ordering efficiency and user experience by ~30%.
- Built admin workflows using Django Admin for CRUD food items, order management, staff control, and analytics, reducing manual operations by ~40%, and deployed using Gunicorn on Render with media uploads and Whitenoise static handling, ensuring scalable backend performance and production stability.

Technologies Used: Python, Django, Django REST Framework (DRF), SQLite, JWT Authentication, REST APIs, Django Admin, Git, GitHub

CERTIFICATIONS

- Python Full Stack Development-10000 Coders
- Front-end development – APSCHE

June 2025-Jan 2026
Jan 2023 - June 2023
